

The process of gifting land to the Sea and Land Trust (SALT) CLG to preserve for nature in perpetuity

1. We will meet you at the property that you wish to put in trust with us and take a tour with you.
2. A 14 day cooling off period and confirm that your wishes are to conserve and preserve your property before we incur costs with proceeding.
3. On your wishes of wanting to proceed, we will consult with our legal advisor.
4. A member of Sea and Land Trust will do a basic assessment of your property with conservation goals.
5. Our legal advisor will liaise with your solicitor and draw up the necessary paperwork
6. When the Legalities are in order, and both donor and Sea and Land Trust are in agreement: transfer occurs.
7. A full ecological assessment is completed by an ecologist, conducting wildlife surveys and cataloguing what is on site already. The preservation of existing wildlife is the immediate goal and a management plan is drawn up.
8. The land is added to the Land Bank and will be conserved for nature forever.
